

Advanced Nanomaterials for Clean Energy and Health Applications (ANCEHA) (WWW.ANCEHA.NO) research group at Western Norway University of Applied Sciences (HVL), Bergen, Norway conducted a clean energy workshop on the 26th and 28th of November - 2018 at HVL, Kronstad, Bergen for the Norwegian school students. Students were given an introduction to the concept of clean energy and the latest developments in clean energy technology. **Mr. Selvakumar Pitchaiya and Mr. Yuvaraj Selvaraj** presented the Indian situation in the clean energy sector and research undertaken by the ANCEHA research group in India. After the presentations, live demonstrations were performed on the usage of dye-sensitized solar cells. As part of the process, students were given the opportunity to have hands-on with the new emerging technologies in solar cells.
